AiSP Events and Updates

AiSP IoT Security Sharing at NTU 2023 3 November 2023

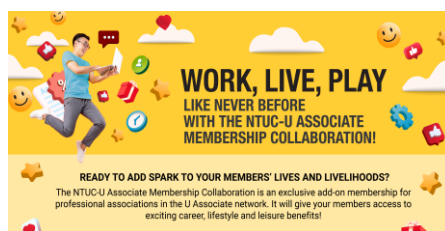

The AiSP 'IoT Day 2023' is a premier gathering of industry experts, professionals, researchers, and enthusiasts dedicated to addressing the critical challenges and exploring innovative solutions in the field of Internet of Things (IoT) security. With the rapid growth and widespread adoption of IoT devices, ensuring their security has become paramount to protect sensitive data, infrastructure, and user privacy.

This event, held in Nanyang Technological University, Singapore (NTU Singapore), focuses on "Empowering Tomorrow's IoT: Unveiling the Shield of Innovation and Igniting Lifelong Learning". NTU Singapore has recently joined the AiSP as a member of the Academic Partner Programme (APP), and is proud to partner AiSP to launch a new NTU Work-Study degree programme co-developed and co-designed with key industry partners in the information communication and technology sector.

We have invited Dr Janil Puthucheary, Senior Minister of State, Ministry of Communications and Information & Ministry of Health, to be our distinguished Guest of Honour for the event. Join us to see how these essential motivations will help to fuel innovation in the IoT sector and allow business and individuals to be prepared for dynamic industry and business changes.

CSIT Mini-Challenge #4 6 – 22 October 2023

Debug the Haunted Pipeline!

As a festive enthusiast, Mighty Saver Rabbit is creating a FastAPI application for the upcoming Halloween. The application provides API endpoints to display Halloween messages. It can also locate haunted places near any MRT station keyed in by users.

He managed to set up a GitLab CI/CD pipeline that consists of 3 jobs: Lint, Test, and Build. However, the pipeline had glitches which caused all 3 jobs to fail.

Acronis CTF – Hack & Learn 2023 23 – 29 October 2023

In the past couple of years Acronis has been holding Capture The Flag (CTF) internally for employees to take part. This year however, Acronis is launching the CTF competition with students. The competition will run from 23-29 Oct.

About CTF - capture the flag, is a type of learning and hacking event where they have one goal: hack in and find a flag 🚩. Flags are placed in various locations in the digital landscape — and their goal is to hunt them all down. Participants will apply their engineer mindset, test their creativity and sharpen their security skills. During this competition, they will solve tasks for professionals; it's a fusion of Jeopardy and Attack and Defense formats, offering them a multifaceted challenge.

Professional Course Development

EC-Council's Blockchain Certifications Overview

EC-Council's blockchain certification courses are curated by experts to support the growing demand for skilled blockchain professionals.

These programs have been designed to meet the industry requirements of developers, business leaders, and fintech professionals in this rapidly growing area.

Our blockchain certification courses consist of three knowledge and competency areas: development, implementation, and strategy.

During the course, students get exposure to multiple blockchain implementation concepts and a unique guideline for sustainable and scalable blockchain development using quantum-resistant ledgers.

Considering the market opportunity and skills required for different target groups, EC-Council has launched three new blockchain programs:

- 1. Blockchain Business Leader Certification (BBLC)**
- 2. Blockchain Fintech Certification (BFC)**
- 3. Blockchain Developer Certification (BDC)**

Blockchain technology is becoming more prominent in today's digital world, and getting certified is a great way to showcase your knowledge and lend credibility to your resume.

EC-Council's expert-designed courses will provide you with hands-on experience and help you gain valuable insights that are mapped to real job roles.
