AiSP x wizlynx group x KnowBe4 – The Human Factor: Your Strongest Defence Against Next-Gen Cyber Threats
14 November 2024

Gartner reports that 93% of organisations are using or considering Generative AI (GenAI) at work. While beneficial, this technology also presents new cybersecurity challenges.

Cyber adversaries are using GenAI to create sophisticated social engineering attacks, including convincing phishing emails and deepfakes. Verizon's 2023 Data Breach Investigations Report reveals that 74% of data breaches stem from social engineering and human error.

To combat these next-generation threats, organisations must build a strong security culture. This involves implementing robust technical defences and empowering employees to be the first line of defence against cyber-attacks.

On 14 November, join wizlynx group and KnowBe4 to learn how you can cultivate a resilient security culture in your organisation. Learn strategies to educate and empower your workforce, enabling them to make smarter security decisions and protect your organisation from evolving cyber threats.

Date: 14 November 2024, Thursday
Time: 2.30PM – 6PM
Venue: JustCo @ Marina Square
