# ICE71 INNOVATION CYBERSECURITY ECOSYSTEM AT BLOCK71

Innovation Cybersecurity Ecosystem at BLOCK71 (ICE71) is the region's first cybersecurity entrepreneur hub. Based in Singapore, ICE71 is a partnership between Singtel Innov8, the venture capital arm of the Singtel Group, and the National University of Singapore (NUS), through its entrepreneurial arm NUS Enterprise. ICE71 is strengthening the region's growing cybersecurity ecosystem by attracting and developing competencies and deep technologies to help mitigate the rapidly increasing cybersecurity risks in the region.

Supported by the Cyber Security Agency of Singapore (CSA) and Info-Communications Media Development Authority (IMDA), ICE71 is focused on developing and supporting early and growth stage cybersecurity entrepreneurs and start-ups from around the world.

ICE71 runs a range of programmes designed to support cybersecurity individuals and start-ups from idea development to the creation, acceleration and scaling of cybersecurity start-ups. The ICE71 Inspire and ICE71 Accelerate programmes are run by CyLon, the leading global cybersecurity accelerator and active investor in early stage cybersecurity start-ups. CyLon's global cybersecurity network and expertise, combined with ICE71's regional knowledge and ecosystem, provides entrepreneurs and start-ups with the support and go-to-market access required to scale a successful cybersecurity business in the region.
