INAUGURAL CYBERSECURITY AWARENESS & ADVISORY WORKSHOP
IIA Singapore - AiSP Evening Talk:
Keeping your data secure for your day to day business

SINGAPORE. The inaugural run of the Cybersecurity Advisory & Awareness Programme (CAAP) curriculum has kicked off with a workshop attended by more than 80 participants from the Institute of Internal Auditors (IIA) and selected SMEs. CAAP is organised by the Association of Information Security Professionals (AiSP) and supported by the Cyber Security Agency of Singapore (CSA).

AiSP President, Dr Steven Wong said: "SMEs are an essential and critical part of the supply chain and their cybersecurity posture could greatly impact business operations. Thus, the Cybersecurity Awareness & Advisory Programme aims to provide them with greater awareness and resources to help them bolster their cybersecurity defences."

Prior to the workshop, AiSP organised two Cybersecurity Awareness & Advisory Focus Group Discussions with the Law Society of Singapore and the Association of Early Childhood & Training Services to discuss how SMEs & the cybersecurity community can work together to create value cybersecurity services for SMEs.

Cybersecurity has always been important. But an increasing trend of large-scale attacks in recent years has resulted in increased urgency to enhance cyber resilience. These incidents show that no organisation is spared from cyber-attacks. Digital transformation initiatives for businesses today thus makes formulating an IT security plan much less simple than it used to be a few years before.

Many businesses process large amounts of confidential customer and/or employee data daily. Our experts in the workshop will help SMEs learn how to improve their cyber defences and reduce business risks.

Programme Line up for 06 December 2018	
6.30pm to 7.00pm	Registration & Dinner
7.00pm to 7.02pm	Welcome address by IIA Executive Director *Speaker: Ms Goh Puay Cheh* Executive Director of IIA

About AISP

The Association of Information Security Professionals (AISP) was registered with the assistance of the Singapore Computer Society (SCS) and the strong support of the Infocomm Development Authority of Singapore (iDA) in February 2008. It was officially launched on 17 April 2008 by Dr Vivian Balakrishnan, Minister for Community Development, Youth and Sports.

AISP aims to:

To promote, develop, support and enhance the integrity, technical competence, management expertise, status and interests of information security professionals in Singapore.

To promote the development, increase and spread of information security knowledge and of any related subject.

About the Cyber Security Agency of Singapore
The Cyber Security Agency of Singapore (CSA) provides dedicated and centralised oversight of national cyber security functions, and works with sector leads to protect Singapore's critical services. It also engages with various industries, and stakeholders to heighten cyber security awareness as well as to ensure the holistic development of Singapore's cyber security landscape. The Agency is part of the Prime Minister's Office and managed by the Ministry of Communications and Information.
