

**Embargoed until 8 April 2025, 9.55AM**

**Launch of the Association of Information Security Professionals (AiSP)'s Legal Investigative Technology Experts (LITE) Special Interest Group at the Inaugural Legal Investigative Technology Experts (LITE) Conference 2025**

**Singapore, 08 April 2025** – The Association of Information Security Professionals (AiSP) organised the Inaugural Legal Investigative Technology Experts (LITE) Conference 2025 as part of the initiatives by its new Legal Investigative Technology Experts (LITE) Special Interest Group (SIG). Through keynote presentations, and expert panels, participants gained insights into how innovative tools and practices were shaping the future of digital investigations. The conference addressed critical issues such as the legal admissibility of digital evidence, ensuring compliance with privacy laws, and managing the ethical considerations involved in using high-tech solutions for investigations. It provided a distinctive platform for legal professionals, law enforcement, forensic experts, and technology innovators to connect, collaborate, and exchange insights on utilising advanced investigative tools, software, and methodologies. Key topics included digital forensics, e-discovery, data privacy, cybersecurity, AI in investigations, blockchain technology, and the adoption of emerging technologies within legal frameworks. More than 100 guests from the industry, public sector and overseas information security associations attended.

Minister of State for the Ministry of Digital Development and Information, Mdm Rahayu Mahzam, was the Guest-of-Honour at the event and delivered the opening address. MOS Rahayu also launched the Legal Investigative Technology Experts (LITE) Special Interest Group (SIG). The interest group aims to provide a platform for AiSP members who are interested in Legal Investigative Technology to learn and exchange ideas with other members and experts on this emerging technology. The group also serves as a collaborative platform that brings together private sector organizations (including law firms), government agencies, and educational institutions to share knowledge and expertise in the collective effort to combat digital crimes.

AiSP Legal Investigative Technology Experts (LITE) SIG Lead, Mr Daniel Wang shared, “It is important to prioritize collaboration across different sectors. Digital crimes are increasingly sophisticated and constantly evolving, which means no single sector can tackle the issue alone. By having strong partnerships and knowledge sharing, we can collectively build more

robust defenses, stay ahead of emerging threats, and create a unified response to the challenges of the digital world”.

The event is supported by the Cyber Security Agency of Singapore (CSA) and seven other industry and professional associations: Centre for Strategic Cyberspace + International Studies, ISACA Singapore Chapter, ISC2 Singapore Chapter, OT-ISAC, Singapore Computer Society, SGTech and Security Systems Association of Singapore.

## **Annex A – Factsheet on The AiSP Legal Investigative Technology Experts (LITE) Conference 2025**

### **About The AiSP Legal Investigative Technology Experts (LITE) Conference 2025**

The Legal Investigative Technology Experts (LITE) Conference is a specialized event designed to bring together professionals from the legal, investigation, and technology space to explore the role of cutting-edge technology in the field of legal investigations. As the digital landscape continues to evolve, the intersection of technology, law, and investigation has become more complex, requiring experts to stay ahead of the curve to effectively tackle emerging challenges.

This conference offers a unique platform for legal professionals, law enforcement, forensic experts, and technology innovators to engage in discussions and collaborations on the use of advanced investigative tools, software, and methodologies. Key topics often include digital forensics, e-discovery, data privacy, cybersecurity, AI in investigations, blockchain, and the integration of emerging technologies into legal frameworks.

Organized by the Association of Information Security Professionals (AiSP), through keynote presentations, and expert panels, participants will gain insights into how innovative tools and practices are shaping the future of digital investigations. The conference also addresses critical issues such as the legal admissibility of digital evidence, ensuring compliance with privacy laws, and managing the ethical considerations involved in using high-tech solutions for investigations.

### **About AiSP**

Started in 2008, the Association of Information Security Professionals (AiSP) aims to:

- Promote the integrity, status and interests of Information Security Professionals in Singapore.
- Develop, support and enhance technical competence and management expertise in cybersecurity.
- Bolster the development, increase and spread of information.
