

**Welcome Remarks by AiSP EXCO Lead for Legal Investigative
Technology Experts (LITE) Special Interest Group
Mr Daniel Wang at AiSP LITE Conference 2025**

08 April 2025, 10am

1. Good Morning

- a. Mdm Rahayu Mahzam, Minister of State, Ministry of Digital Development and Information
- b. Industry Partners,
- c. Friends from the Media,
- d. Ladies and Gentlemen,

2. It is my pleasure to welcome all of you to the first Legal Investigative Technology Experts (LITE) Conference in 2025 and the official launch of this Special Interest Group. I would like to express my gratitude to Mdm Rahayu Mahzam for taking time off despite her busy schedule to join us in this morning's conference.

3. The Legal Investigative Technology Experts (LITE) Conference is a specialized event designed to bring together professionals from the legal, investigation, and technology space to explore the role of cutting-edge technology in the field of legal investigations. As the digital landscape continues to evolve, the intersection of technology, law, and investigation has become more complex, requiring experts to stay ahead of the curve to effectively tackle emerging challenges.

4. This conference offers a unique platform for forensic experts, legal professionals, law enforcement, and technology innovators to engage in discussions and collaborations on the use of advanced investigative tools, software, and methodologies. Key topics often include digital forensics, e-discovery, cybersecurity, blockchain, and the integration of emerging technologies into legal frameworks.

5. Today's event marks another milestone for AiSP as we officially launched the Legal Investigative Technology Experts (LITE) Special Interest Group and we have more than 60 members joining this interest group since earlier this year. This interest group aims to offer a collaborative platform that brings together private sector organizations (including law firms), government agencies, and educational institutions to share knowledge and expertise in the collective effort to combat digital crimes.

6. It is important to prioritize collaboration across different sectors as digital crimes are increasingly sophisticated and constantly evolving, which means no single sector can tackle the issue alone. By having strong partnerships and sharing knowledge, we can collectively build more robust defenses, stay ahead of emerging threats, and create a unified response to the challenges of the digital world.

7. The LITE special interest group hope to build more partnerships by identify key stakeholders such as law enforcement, tech companies, universities, law firms, and cybersecurity organizations which in return create a network of experts and thought leaders in digital investigations; and organise webinars, workshops, and conferences to build visibility and credibility. In the years ahead, we also aim to create working groups or committees focused on specific expertise of digital investigations i.e. mobile forensics, cloud forensics, computer forensics and strengthen collaboration with governmental bodies to ensure aligned efforts.

Partners & Sponsors

8. I extend my sincere appreciation to our partners and sponsors whose generous support has made the AiSP LITE Conference 2025 possible. In no particular order:

Supporting partners:

- Centre for Strategic Cyberspace + International Studies
- ISACA Singapore Chapter
- ISC2 Singapore Chapter
- OT-ISAC
- Singapore Computer Society
- SGTech
- Security Systems Association of Singapore

Sponsors:

- Magnet Forensics
- Bounga Informatics
- FTI Consulting

Conclusion

9. In closing, I would like to thank all of you for joining us at this year's conference. I hope the insights shared here will empower you to harness the importance of knowledge sharing and excite all of you to join the LITE Special Interest Group. Wishing everyone a productive and insightful day filled with meaningful exchanges of ideas and experiences.
